## **SCHOOL NUTRITION ASSOCIATION**

### **Diversity Statement**

The School Nutrition Association acknowledges and embraces the value of human diversity. We believe it enriches our organization and enhances professional and personal growth. Diversity improves the quality of the educational and learning experience and fosters global networking.

We recognize diversity as a strength where each person is respected and valued as an individual and appreciated for the variety of experiences, knowledge, abilities and ideas that each brings to SNA. We believe that the exchange of diverse views, ideas and knowledge contribute to the success of the organization.

SNA promotes an inclusive environment. Therefore, we are committed to dedicating the time and resources to enhance the opportunities for everyone to participate, contribute and fulfill their potential. We encourage leaders at all levels to recognize the value of diversity and to promote inclusiveness in membership, participation and leadership.

We welcome the range of human differences, including, but not limited to, race, gender, ethnicity, religion, age, physical ability, culture, sexual orientation, education, geographic location, and professional level.
