

## ABSTRACT

SNA surveyed its school nutrition director members in November 2022 to evaluate economic, operational and regulatory challenges for school nutrition programs and assess the impact of the loss of federal pandemic waivers.

## 2023 School Nutrition Trends Report

Appendix B - Please indicate the extent to which each of the following product ..... 44 types have been a challenge to procure: Disaggregated by USDA FNS region, Free and Reduced Rate, and District Enrollment
Appendix C - What effect, if any, has the loss of the federal pandemic waiver ..... 49allowing all schools to offer free meals to all students, had on concerns/complaintsfrom families: Disaggregated by USDA FNS region, Free and Reduced Rate, andDistrict Enrollment
Appendix D-Level of concern for the following proposed ..... 54
requirements being considered for inclusion in a new proposed rule to update federal school nutrition standards: Disaggregated by USDA FNS region, Free and Reduced Rate, and District Enrollment

## Objectives

- Identify the most salient current challenges facing school nutrition programs.
- Track the adequacy of reimbursement rates, trends in school meal prices and the impact of the loss of federal pandemic waivers.
- Evaluate the extent of unpaid meal charges and debt.
- Provide a snapshot of average daily participation (ADP) by comparing October 2022 vs. October 2021 data.
- Examine concerns regarding forthcoming rules to update federal school nutrition standards.

## Background and Sample

Figure 1. Background and Sample

| Survey open period | November 7-21,2022 |
| :--- | :---: |
| Full sample of surveyed school districts | 4,084 |
| Total number of unique respondent school <br> districts | 1,230 |
| Response rate | $30.1 \%$ |

SCHOOL NUTRITION Association

## Executive Summary

## Challenges for School Meal Programs

The top 3 challenges for school meal programs are:

1) Increasing costs
2) Staff shortages
3) Menu item shortages

- $99.8 \%$ of respondents indicated increasing costs as a challenge for their school nutrition program.
- As district enrollment increases, so does the percentage of school nutrition programs identifying staff shortages as a significant challenge: $43.4 \%$ of districts with fewer than 1,000 total students report staff shortages as a significant challenge, while $79.1 \%$ of districts with 25,000 or more total students report staff shortages as a significant challenge.

The top 3 most challenging items to procure:

1) Breakfast items (e.g. cereals, granola bars, biscuits, pancakes)
2) Entrees (e.g. pizza, burritos, chicken, burgers)
3) Snacks (e.g. crackers/chips)

## School Meal Reimbursements

- Only around a quarter of respondents report the SY 2022/2023 NSLP/SBP per meal reimbursement rates are sufficient to cover costs of producing a reimbursable meal (breakfast: $27.2 \%, n=299$; lunch: $24.9 \%, n=273$ ). Over half of respondents reported SY 2022/2023 NSLP/SBP were not sufficient to cover the cost of producing a reimbursable meal (breakfast: 54.7\%, $\mathrm{n}=601$; lunch: $56.6 \%, \mathrm{n}=620$ ).
- $99.2 \%(n=1,094)$ of respondents indicate moderate or serious concern regarding the adequacy of the NSLP/SBP per meal reimbursement rates when the additional Keep Kids Fed Act reimbursements expire at the end of SY 2022/2023. Districts with enrollment of 25,000 or more students report the highest level of serious concern.

## Loss of Waiver Allowing Free Meals

- Of the districts that indicated they charge for meals, a majority reported that the loss of the federal pandemic waiver allowing all schools to offer free meals to all students had caused an increase in unpaid meal charges/debt ( $96.3 \%, \mathrm{n}=680$ ), concerns/complaints from families ( $86.8 \%, \mathrm{n}=610$ ), paperwork/administrative burden ( $86.5 \%, \mathrm{n}=610$ ) and stigma for low-income students ( $66.8 \%, \mathrm{n}=471$ ).
- $50.0 \%(n=614)$ of responding school nutrition programs are offering free breakfast to all students district-wide, and $39.3 \%(\mathrm{n}=481)$ of responding school nutrition programs are offering free lunch to all students district-wide.

## Unpaid Meal Debt

- Total accumulated debt for all respondents reporting unpaid meal debt $(\mathrm{n}=847)$ was $\$ 19.2$ million. Per district debt varies widely, from a low of $\$ 15$ to $\$ 1.7$ million.
- The overall reported median unpaid meal debt was $\$ 5,164.00(n=847)$. For districts that do not offer free meals to all students, median unpaid meal debt was \$6,000 ( $n=698$ ).
- $97.9 \%$ (697) of programs not offering free meals to all students district-wide reported unpaid meal debt, while only $33.0 \%$ (149) of programs offering free meals to all students district-wide reported unpaid meal debt.
- Respondent school nutrition programs in the Midwest (88.1\%, $\mathrm{n}=247$ ), the Mountain Plains ( $95.5 \%, \mathrm{n}=102$ ), and those with lower free and reduced rates ( $<26 \%$ : $87.8 \%, \mathrm{n}=158$; $26-50 \%$ : $87.5 \%, n=343$ ) reported the presence of unpaid meal debt at the highest rates.

## Average Daily Participation (ADP)

- Both breakfast and lunch average daily participation (ADP) in Oct. of 2022 were lower than ADP in Oct. 2021. On average, reported breakfast ADP was 10.8\% lower in Oct. 2022, as compared to Oct. 2021. Lunch ADP was 5.7\% lower in Oct. 2022 as compared to Oct. 2021.
- Programs that offer free meals to all students district-wide reported an increase in ADP for both breakfast ( $8.9 \%$ increase in Oct. 2022 compared to Oct. 2021) and lunch (6.4\% increase in Oct. 2022 compared to Oct. 2021). Meanwhile, programs that did not offer free meals to all students district-wide reported lower ADP for both breakfast ( $23.1 \%$ decrease in Oct. 2022 compared to Oct. 2021) and lunch (13.2\% decrease).

## Updates to School Nutrition Standards

- $97.8 \%(n=1,078)$ of respondents are moderately or seriously concerned regarding the availability of foods that will meet target 1A sodium limits and are well accepted by students.
- $88.4 \% ~(\mathrm{n}=972$ ) of respondents are moderately or seriously concerned about a mandate that all grains offered with school meals be whole grain rich is being considered for inclusion in a new proposed rule to update federal school nutrition standards.
- $\quad 94.4 \%(n=1,020)$ of respondents are moderately or seriously concerned about new limits on added sugar being considered for inclusion in a new proposed rule to update federal school nutrition standards.

## Results

## Challenges for School Meal Programs

The top 3 challenges for school meal programs are:

1) Increasing costs
2) Staff shortages
3) Menu item shortages

Refer to Appendix A for response summary tables on each challenge, disaggregated by USDA FNS region, free-and-reduced percentage rate, district enrollment and other selected variables.

Several statistically significant associations were identified, including:

- As district enrollment increases, so does the percentage of school nutrition programs identifying staff shortages as a significant challenge: $43.4 \%(n=69)$ of districts with fewer than 1,000 total students report staff shortages as a significant challenge, while $79.1 \%$ ( $\mathrm{n}=$ 87) of districts with 25,000 or more total students report staff shortages as a significant challenge.
- Only $12.6 \%(n=39)$ of school nutrition programs that are Community Eligibility Provision (CEP) district-wide identified getting families to submit free-and-reduced meal applications/household income forms as a significant challenge, while almost half (49.8\%, n $=438$ ) of school nutrition programs that are not CEP district-wide identified getting families to submit free-and-reduced meal applications/household income forms as a significant challenge.
- $65.4 \%(n=477)$ of school nutrition programs that do not offer free meals to all students district-wide identified unpaid meal debt as a serious challenge, compared to only 10.9\% (n = 50) school nutrition programs that do offer free meals to all students district-wide. 71.8\% ( $n=329$ ) of programs that offer free meals to all students district-wide reported that unpaid meal debt was not a challenge.

Figure 7. Challenges for School Meal Programs

Note: Number of responses varies by item, with minimum $n=1,187$ and maximum $n=1,193$. Percentages may not total 100 due to rounding.

Figure 8. Most challenging items to procure

Refer to Appendix B for response summary tables on each challenge, disaggregated by USDA FNS region, free-and-reduced percentage rate, district enrollment, and other selected variables.

Note: This question was only asked of those who selected 'Menu item shortages' or 'Menu items discontinued' as Moderate or Significant challenges in the prior question from Figure 7. Number of responses varies by item: minimum $\mathrm{n}=$ 1,152 , maximum $n=1,160$. Percentages may not total 100 due to rounding.

NUTRITION
Association

## School Meal Prices and Reimbursements

Figure 9. Is your program currently offering free school breakfast and/or lunch to ALL students districtwide?

Note: School nutrition programs offering free meals to all students districtwide may do so through several means: Community Eligibility Provision (CEP) district-wide, local or state provision of free meals for all students, or a combination of the previous. Breakfast $n=1,229$, lunch $n=1,224$. Percentages may not total 100 due to rounding.

Figure 10. Per meal charge for students who pay full price for reimbursable meals for SY 2022/23

Figure 20. What effect, if any, has the loss of the federal pandemic waiver allowing all schools to offer free meals to all students, had on the following?

Refer to Appendix C for response summary tables on each challenge, disaggregated by USDA FNS region, free-and-reduced percentage rate, district enrollment, and other selected variables.

Note: This question only asked of those who indicated that they were not $100 \%$ CEP districts and indicated that they were not providing breakfast and/or lunch for free to all students in their district. Number of responses varies by item: minimum $n=706$, maximum $n=730$. Percentages may not total 100 due to rounding.

Note: Debt ranges from $\$ 15$ to $\$ 1,700,000$. Among the 847 unique school districts that reported their unpaid meal debt, total accumulated debt equaled $\$ 19,189,031$.
*A chi-square test of independence showed there is a statistically significant association between FNS Region and Free and Reduced \% and Offering Free Meals to ALL students districtwide, and reporting that a school district has unpaid meal debt.

[^0]
## Average Daily Participation

Survey takers were asked to report their average daily participation (ADP) in October 2021 and October 2022 for both lunch and breakfast.

The following directions for reporting ADP were given:
"ADP should be calculated by dividing the number of meals served in a month by the number of operating days in that month.

Please round to a whole number (e.g. 8,000 lunches $/ 21$ days $=380.95$, so Lunch ADP $=381$ ).

Please leave any cells for which you do not have data blank."
